After selecting a student's name, you will see the information here. The student's first and last name, as well as student ID, grade, school and family ID will all appear at the top.

The Transportation box contains all the routing information. The inbound information will be the routing information to school and the outbound will be the information home from school.

There are 2 different types of reports that can be run from the Reports screen. One is a Student List report which will give you all the routing information for students in a specific school or grade. The other is a Stop Locations Report.
